#### REMARKS

The figures of births and deaths shown in this statement for week ending the 14th July, 1956 relate to 249 towns with an estimated population of 35,463 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 79% of the total number of towns representing 85% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 19,507 and 8,081 representing birth and death rates of 28.6 and 11.8 per thousand of population respectively.

(a) States (Part A and C).—The data here relate to 206 towns with an estimated population of 29,864 thousands. Information about Assam, could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 82% of the total number of towns representing 89% of the total population is covered. The number of births

and deaths recorded in these towns were 16,837 and 7,147 representing birth rates and death rates of 29°3 and 12°4 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B).—The data here relate to 43 towns with an estimated population of 5,599 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 66% of the total number of towns representing 69% of the total population is covered. The number of births and deaths recorded in these towns were 2,670 and 934 representing birth and death rates of 24.8 and 8.7 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
